

IMPERIAL FINANCE

White Papers

APY AND BUSD REFLECTIONS

Imperial Finance the First HIGH APY and BUSD REFLECTIONS crypto project. We designed our contract to give it the capabilities of TWO passive incomes. One in our 156,924.2 % APY positive rebase every min 1440 times a day. Two is our BUSD Reflections which you can claim every hour on our DAPP. Busd reflections are based off of BUY and Sell volume. 6% from every buy will be distributed back to the holders in BUSD and 7% of every sell will do the same. If you happen to not claim every hour it will accumulate and you can claim when ever you have time

PIXEL NFT Project

The PIXEL NFT will be a place where you can showcase your NFT/ART/PHOTOS across a giant grid. Each square/pixel will be yours to own. The project will use Imperial's native token to purchase. 70% of the purchases will go directly into a locked wallet to hold the price floor. 30% of it will go towards product development. Once the collage of all the pixels are filled we will auction it off and profits from the project will be shared amongst our holders.

Marketplace

Imperial Marketplace is where imperial tokens will be accepted to buy goods. We will be incorporating an escrow service so payments will be held until the buyer gets their goods. This way you wont need to sell or convert to fiat but just purchase from a line of products.

Events and Giveaways

We plan on holding events for various products that launch. For Example the Pixel NFT will go through phases of marketing and we hope to have our holders and owners of the project attend using their NFT as a ticket.

Future...

The future for imperial is bright. We developed a double passive income suitable for traders who are looking to buy and hold. We have utilities that will keep coming. As we grow we will create more and more products to utilize the imperial ecosystem at its best. Be sure to join the most promising project of 2022.
